- Class Teacher is an Information technology company located in Nairobi, Kenya serving schools and parents countrywide. Having partnered with **Safaricom** and **Amazon** as service providers ,we pride ourselves on being the leading provider of school management I.T solutions in East Africa. We are committed to delivering an all round application and system for easy management of schools.
- Class Teacher is a private company registered as Class Teacher Nexus Limited. Its main focus is to provide long term school management solutions. Our goal is to become Schools first choice for school software services. We study and understand the unique needs in a school set up and provide high level I.T solutions. We provide cost effective services and support therefore allowing the school to get the best from the I.T investment.
- Class Teacher is a software application that automates the interaction between key stakeholders (School Administration, Teachers and Parents) in the school environment. The platform enables the school administration and teachers to communicate directly with the parents. Class Teacher maximizes parent teacher engagement in schools. It monitors the teachers' input in class. Class Teacher keeps precise records on the child's all round performance.

Class Teacher brings **students' school activity** closer to parents and makes **teaching tools** more accessible to teachers.

Track your child's academics.  
Teach your classes more easily.

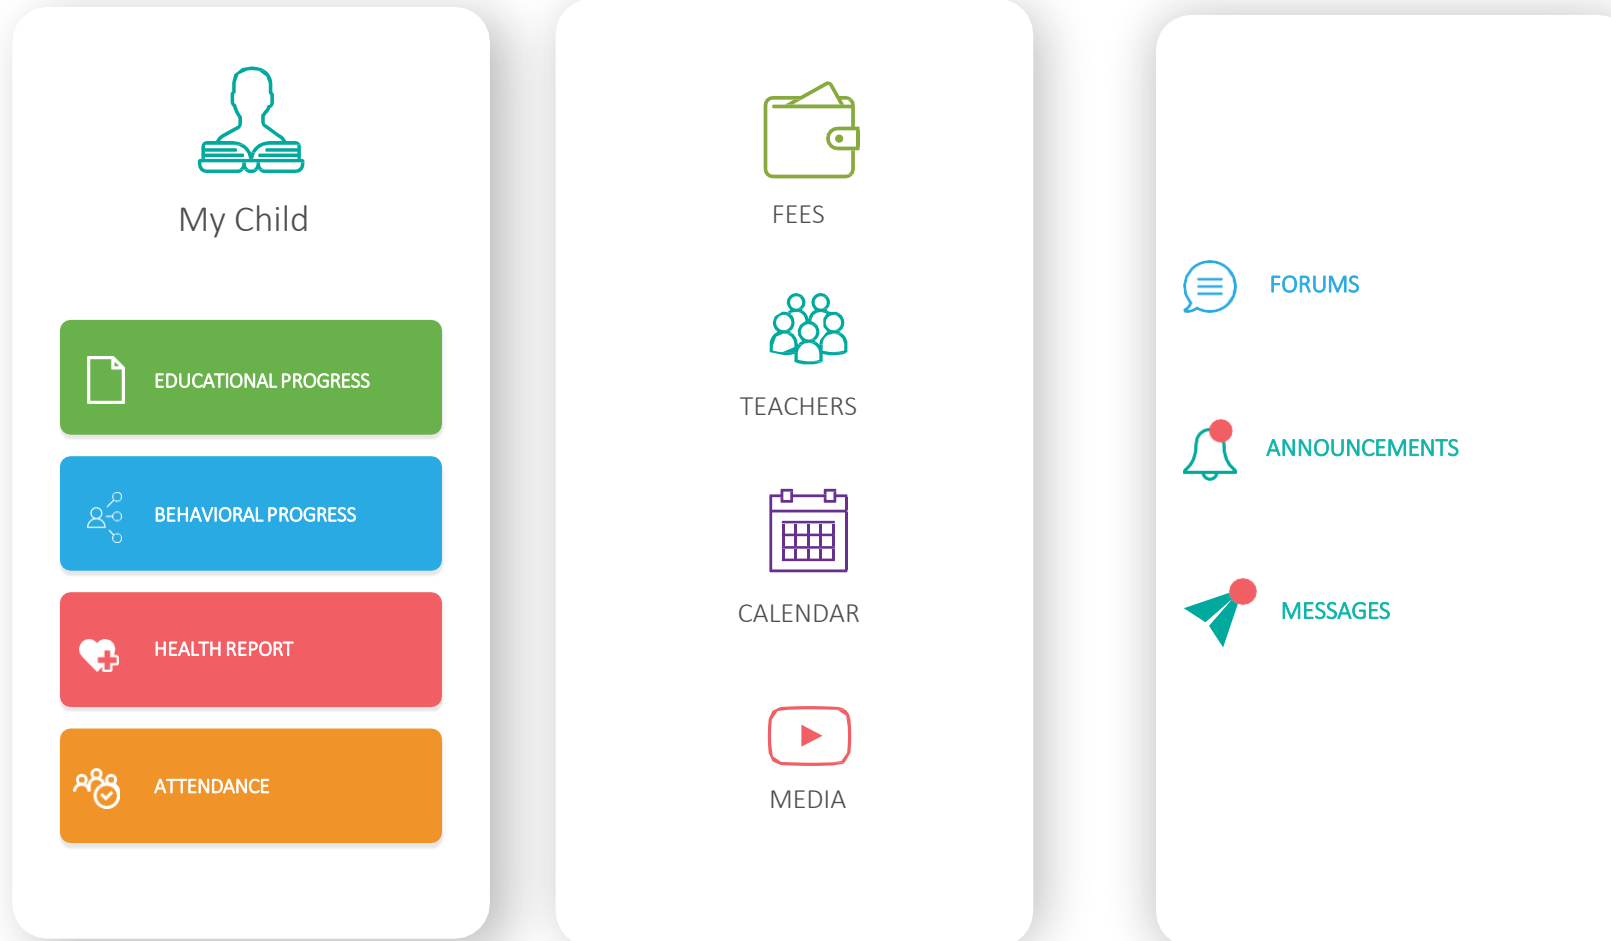

# Introduction

- Class Teacher is a software application that automates the interaction between key stakeholders (School Administration, Teachers, Parents) in the school environment.
- The platform enables the school administration and teachers to communicate directly with the parents.
- Class Teacher maximizes parent teacher engagement in schools.
- It monitors the teachers' input in class.
- Class Teacher keeps precise records on the child's all round performance.
- The Class Teacher application is composed of three constituent user interfaces for each of the above named stakeholders.

For Parents

# All Modules

Get insights on your child's progress at school with real-time updates. The parent interface allows the parent real time oversight of all activities and progress of their child's school life.

You can get photos and videos of school events, activities and so much more.

For Teachers and Schools

# All Modules

 MESSAGES

Class Teacher enables teachers and school to digitize students records. Enabling them to share students' progress with parents in real time

Keep track of students' academic

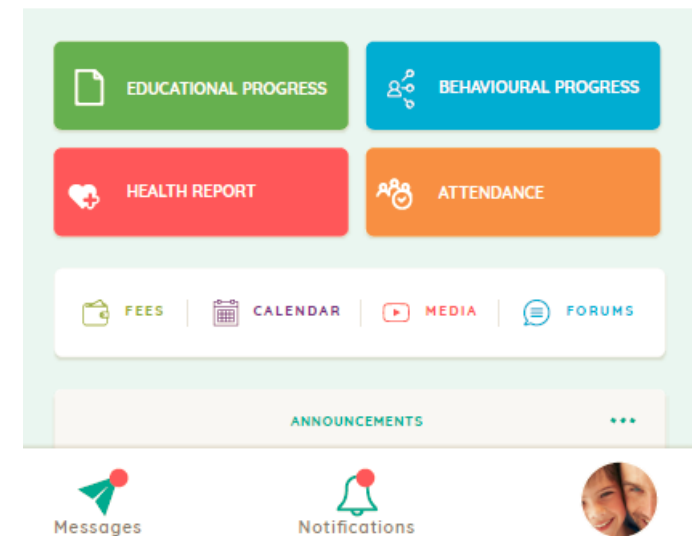

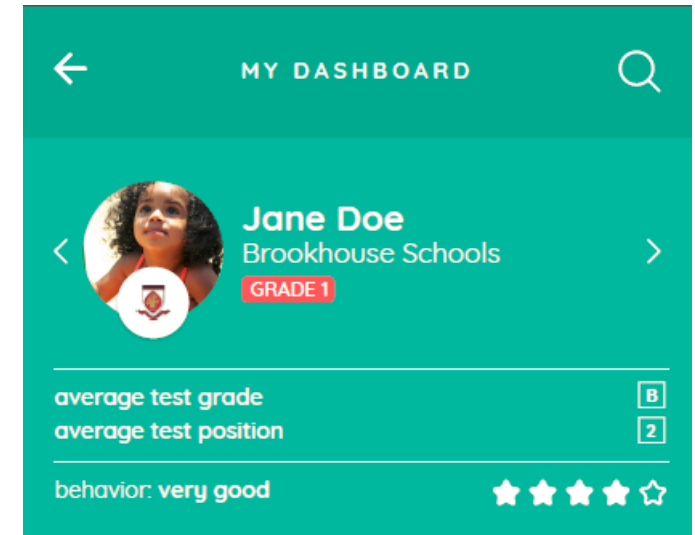

Keep track of students behavioral progress.

Manage students' health reports

Monitor and record students' attendance

## Parent Interface: Dashboard

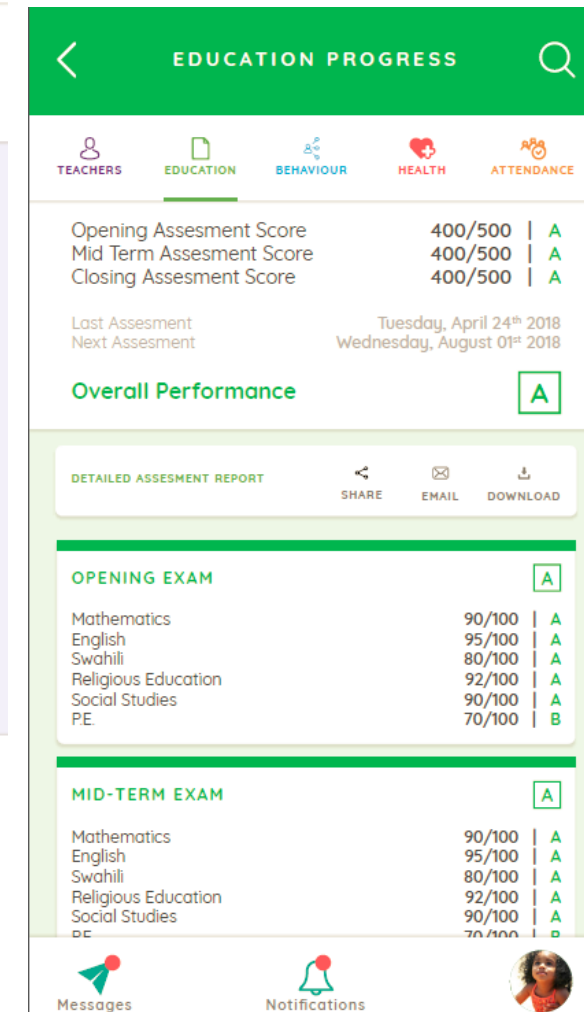

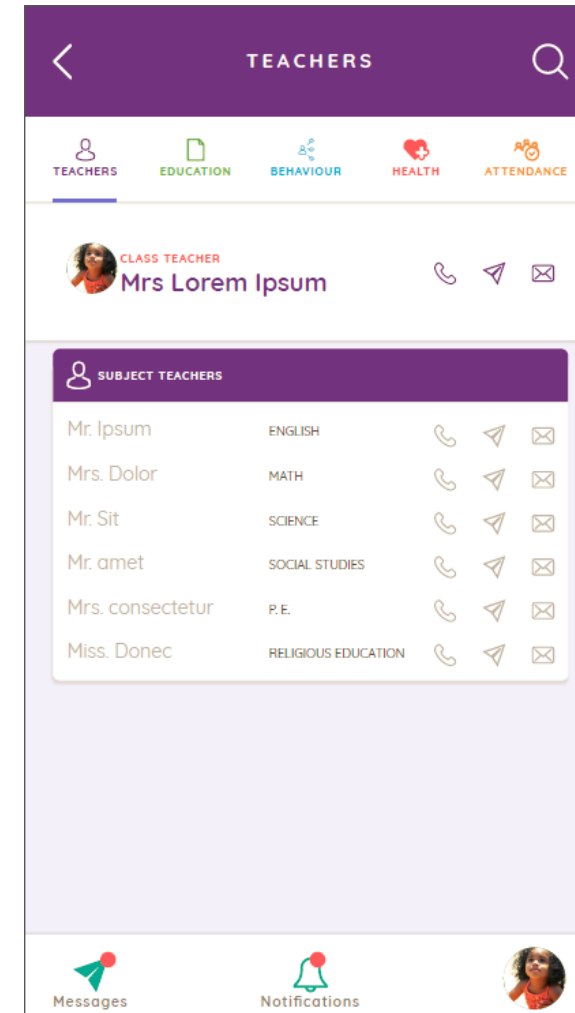

- The parent interface allows the parent real time oversight of all activities and progress of their child's school life.
- It has five pages, the main dashboard, the announcements page, the messages page, the notification page and the settings page.
- The dashboard page gives access to the **primary services** of the application, allowing parents to monitor educational progress, behavioral progress, health reports and class attendance reports.
- From the dashboard, parents can also access **administrative services** including a fees report, the school calendar, announcements from the school, participate in forums with the teachers and other parents and review multimedia files from the school.

# Parent Interface: Primary Services

## Educational Progress:

- From the dashboard, parents can navigate to the educational progress page, where they can access the following information:
  - Teachers** for each subject, their contact details and be able to message, email or call them directly from the app.
  - Academic Performance** for all assessments taken during the term period, broken down into the performance per subject.
- The academic performance records are entered directly by the teachers and hence cannot be tampered. Parents are notified when reports are uploaded and are able to download report forms directly from the app and even email / share them if need be.

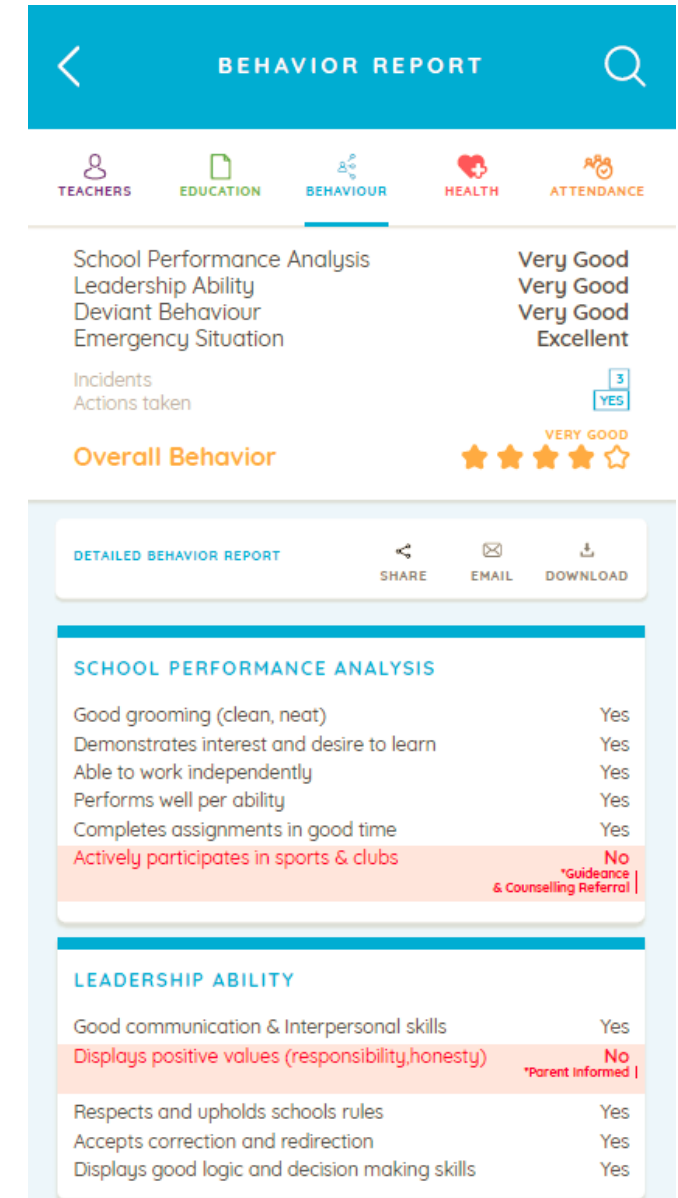

# Parent Interface: Primary Services

## Behavioral Progress:

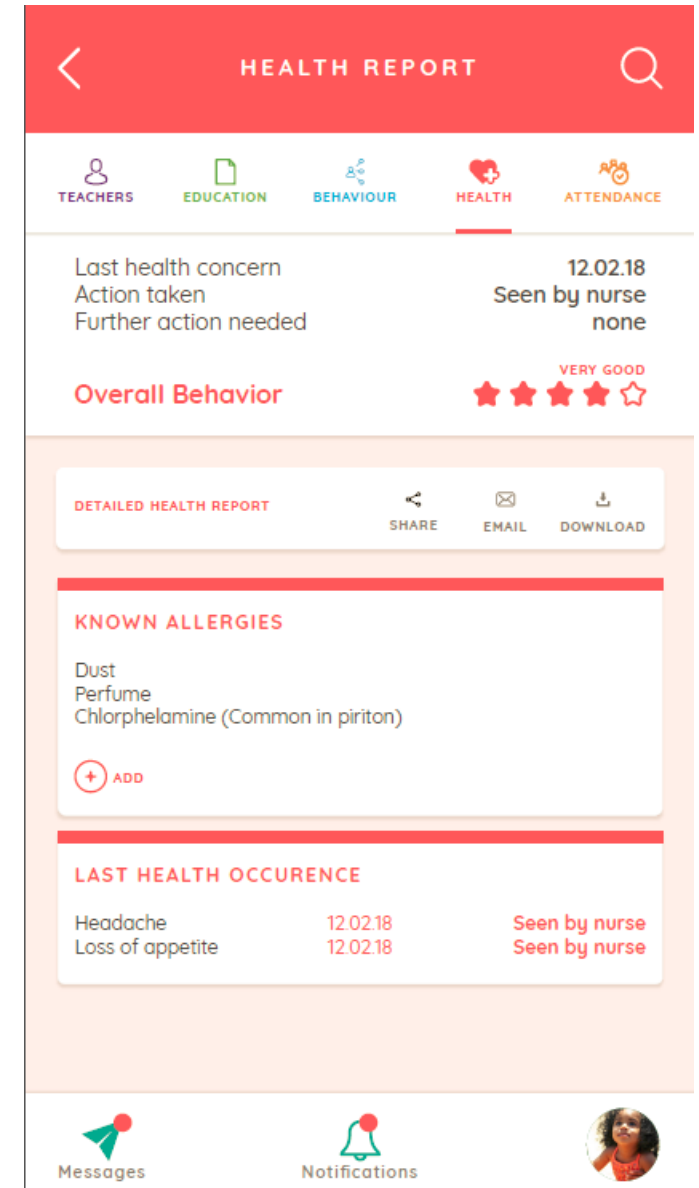

- The Class Teacher application gives parents visibility to the all round development of their child by tracking their behavioral progress.
- On this page customizable metrics are tracked such as:
  - School performance analysis: grooming, interest to learn, independence, punctuality, sports and club participation, e.t.c.
  - Leadership ability: communication and interpersonal skills, values, respect for authority, decision making skills, e.t.c
  - Deviant behavior.
  - Emergency situations.
- Parents are notified when any metrics are updated by the teacher on the app.

# Parent Interface: Primary Services

## Health Report:

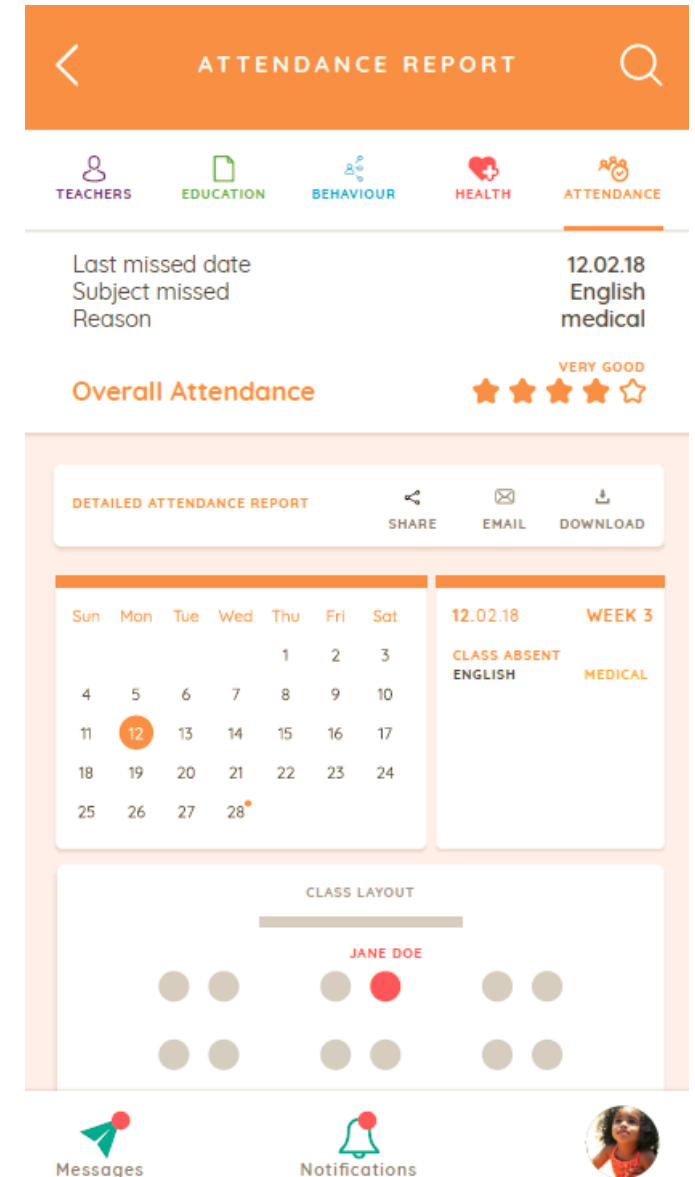

- The Class Teacher application allows parents review the health records of their children.
- The app allows parents to see when the last concern occurred, the action taken by the school and if further action was recommended.
- Special health considerations of the child are also recorded on the app, such as known allergies, blood group, e.t.c which constitute valuable information in case of an emergency.
- Parents are notified when any health occurrences are updated on the app.

# Parent Interface: Primary Services

## Attendance Report:

- The final of the primary services is the attendance report.
- This gives parents visibility of their child's class attendance, showing any missed classes and the reasons for the same.
- Additionally the page also informs the parent of the class layout and the seating position of their child.

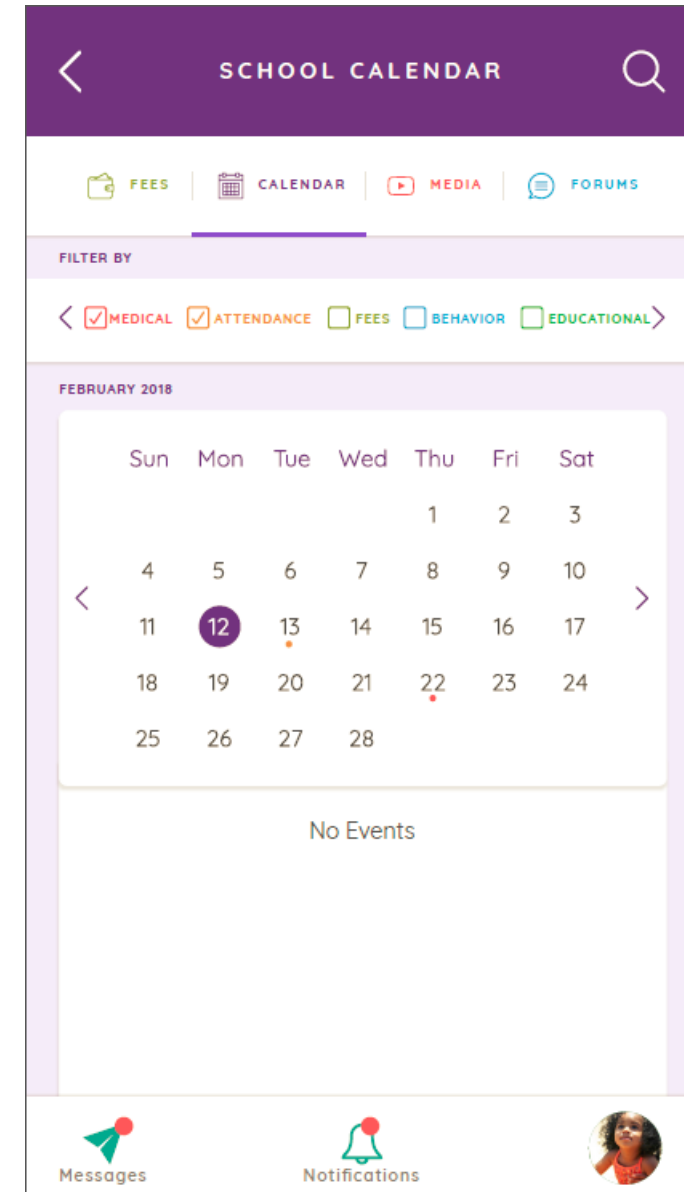

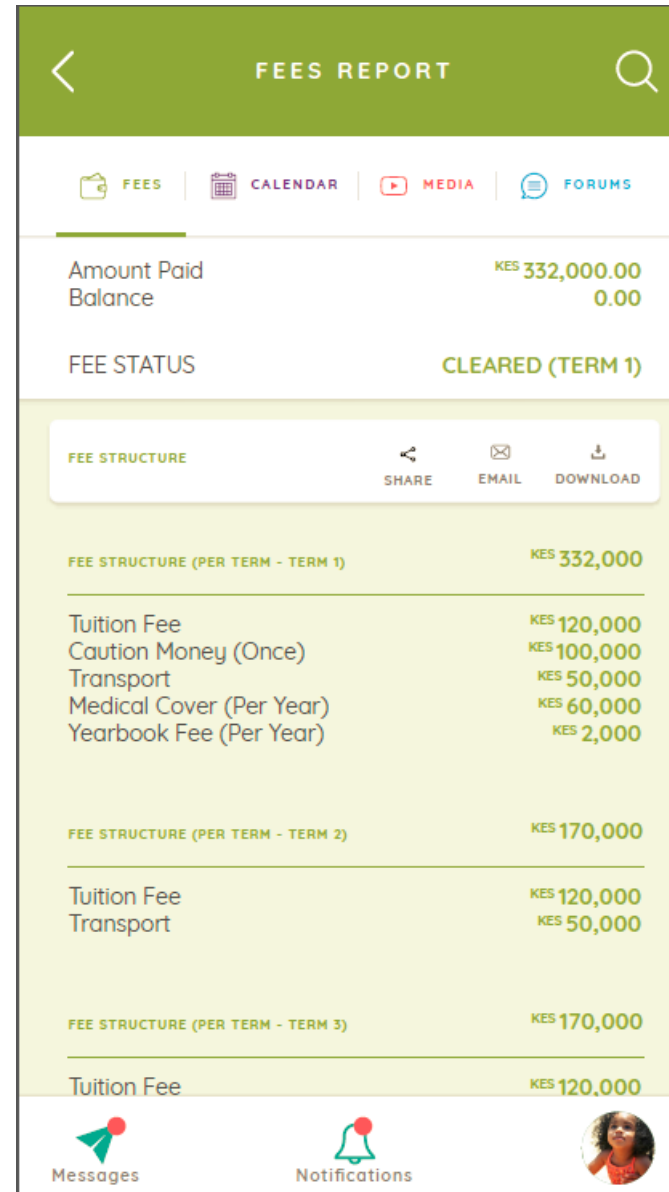

# Parent Interface: Administrative Services

## Fees Report:

- On this interface parents are able to access the fees structure.
- Parents are also able to view paid and unpaid fee balances.

## School Calendar:

- All school events are entered here and parents are able to view these at any time.
- The app sends reminders to parents for any upcoming events.

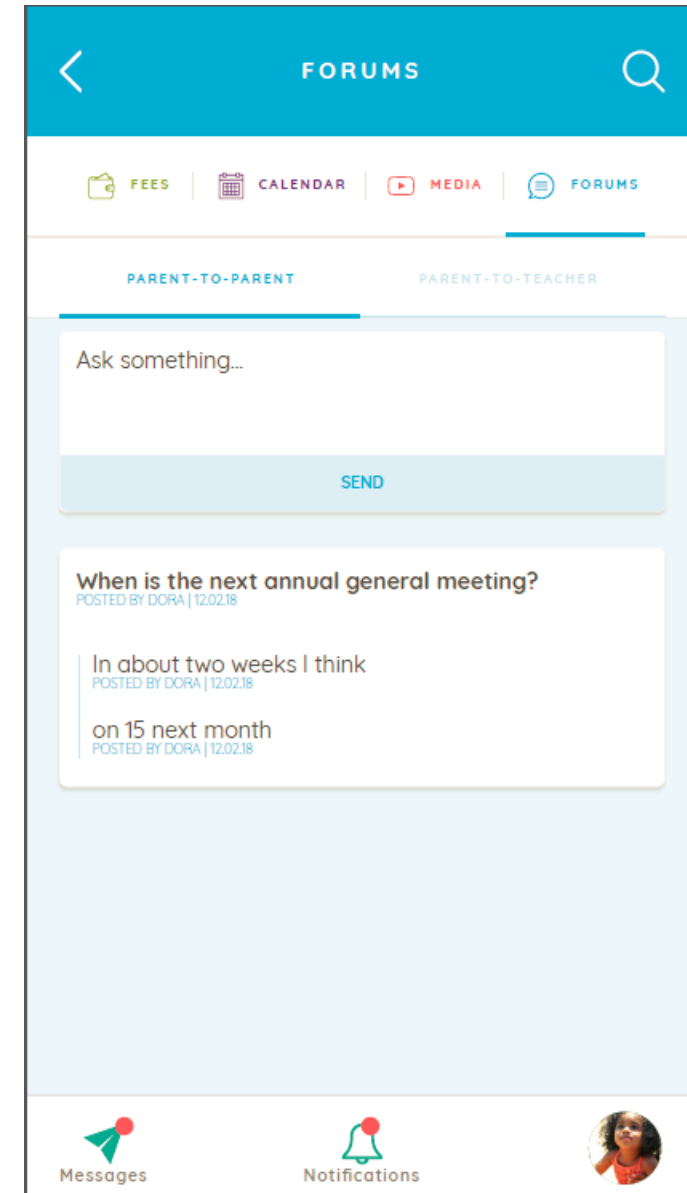

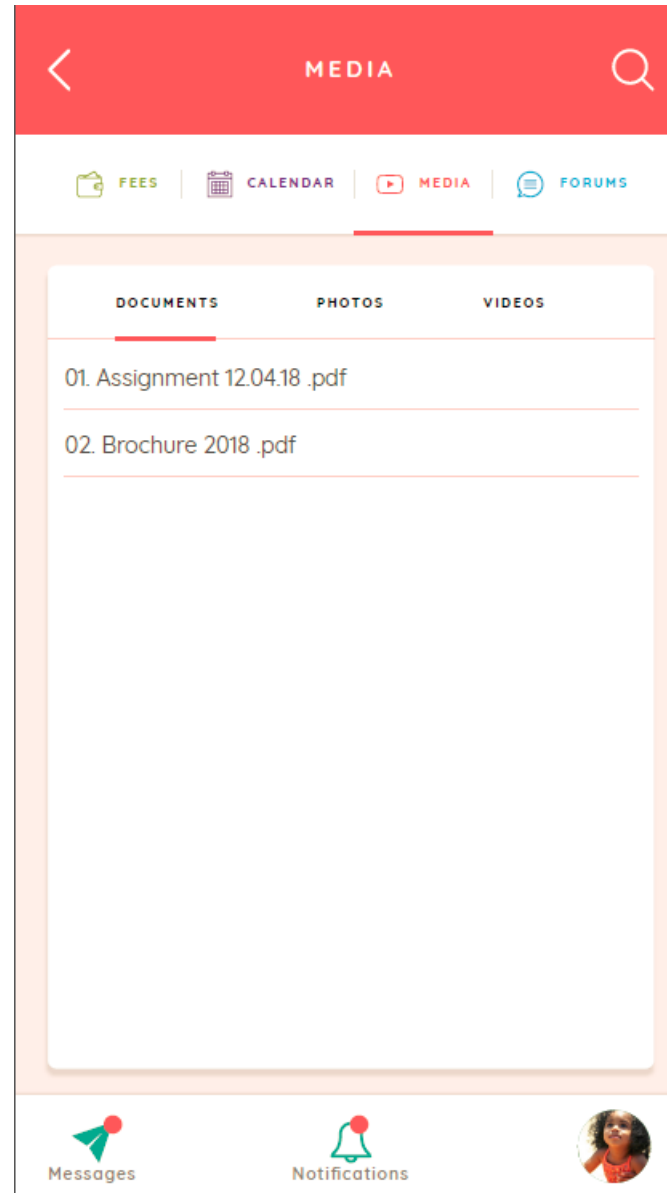

# Parent Interface: Administrative Services

## Multimedia:

- Teachers are able to upload assignments here.
- Pictures and videos of school events can also be uploaded here.

## Forums:

- Parent to parent discussions can be held on this platform through broadcast messages.
- Parents to teachers discussions can similarly also be held here.

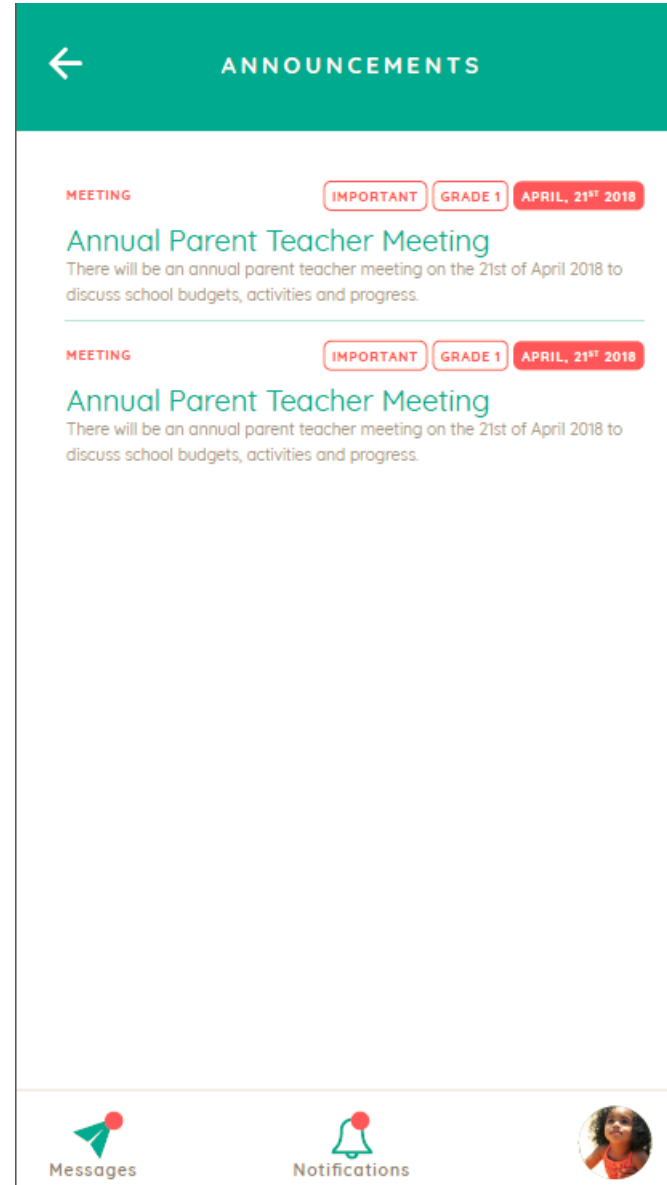

# Parent Interface: Announcements and Notifications

## Announcements:

- Parents are able to view any announcement from the school administration here.
- This includes invitations to school events or meetings.

## Notifications:

- On this page parents are able to view all notifications sent to them either by the school administration, teachers or other parents.

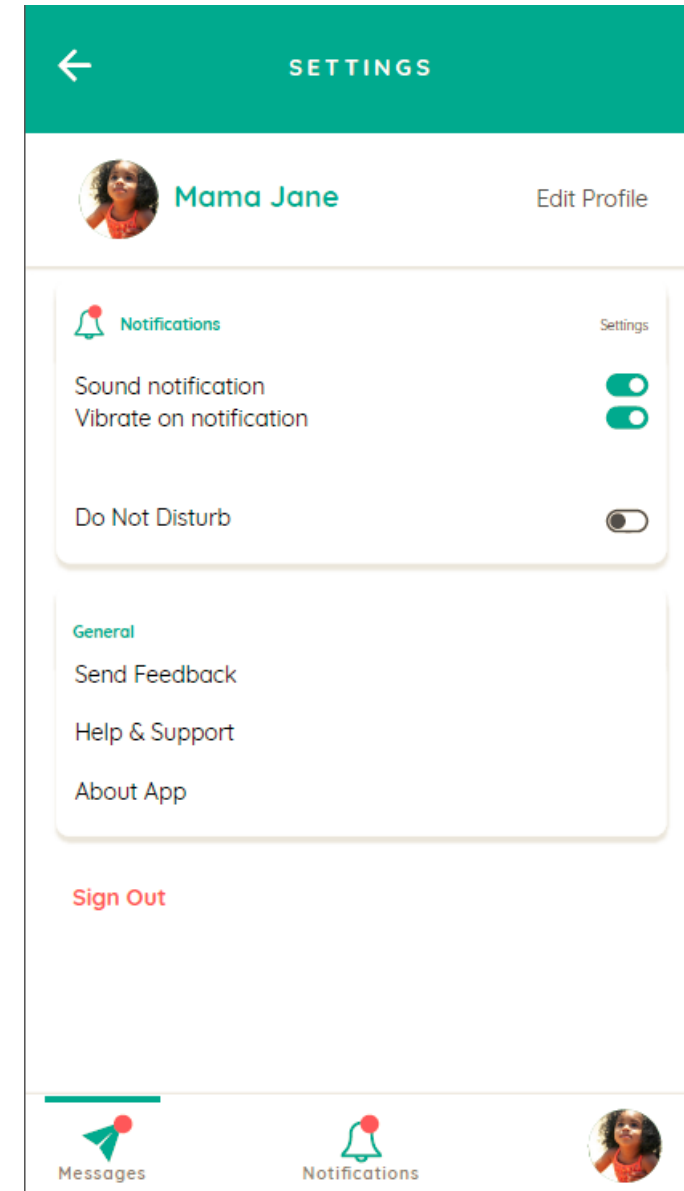

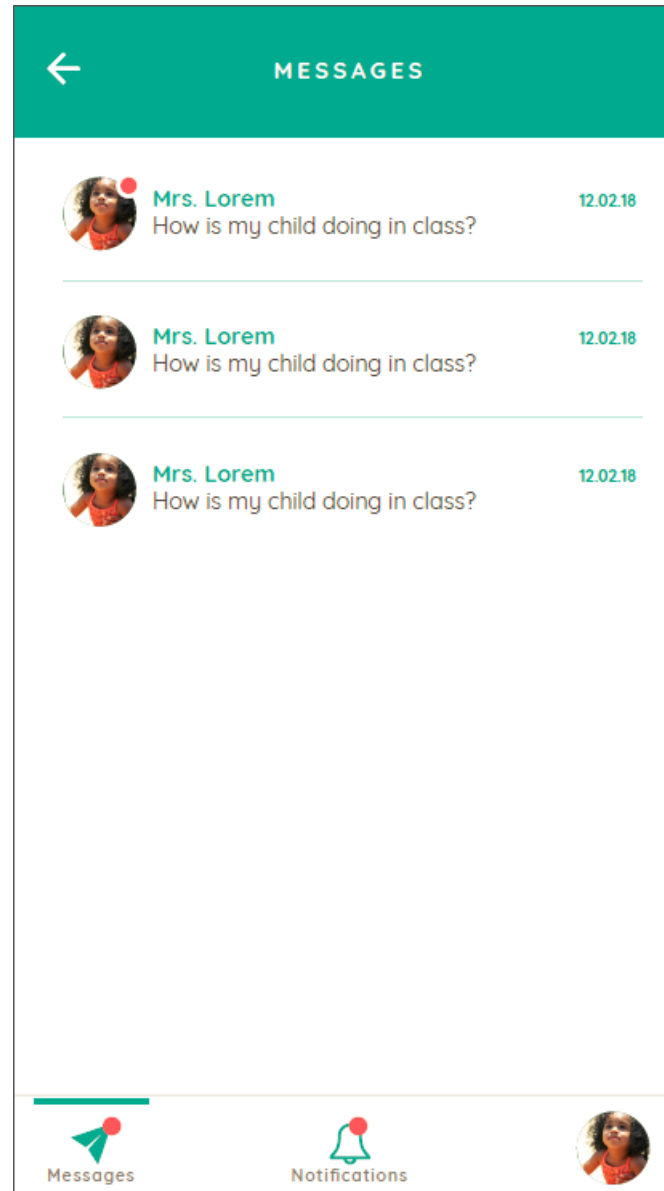

# Parent Interface: Messages and Settings Pages

## Messages:

- This interface allows parents to communicate directly with a certain teacher in a private chat.

## Settings Page:

- On this page the parent is able to adjust profile details and the functional settings of the app.

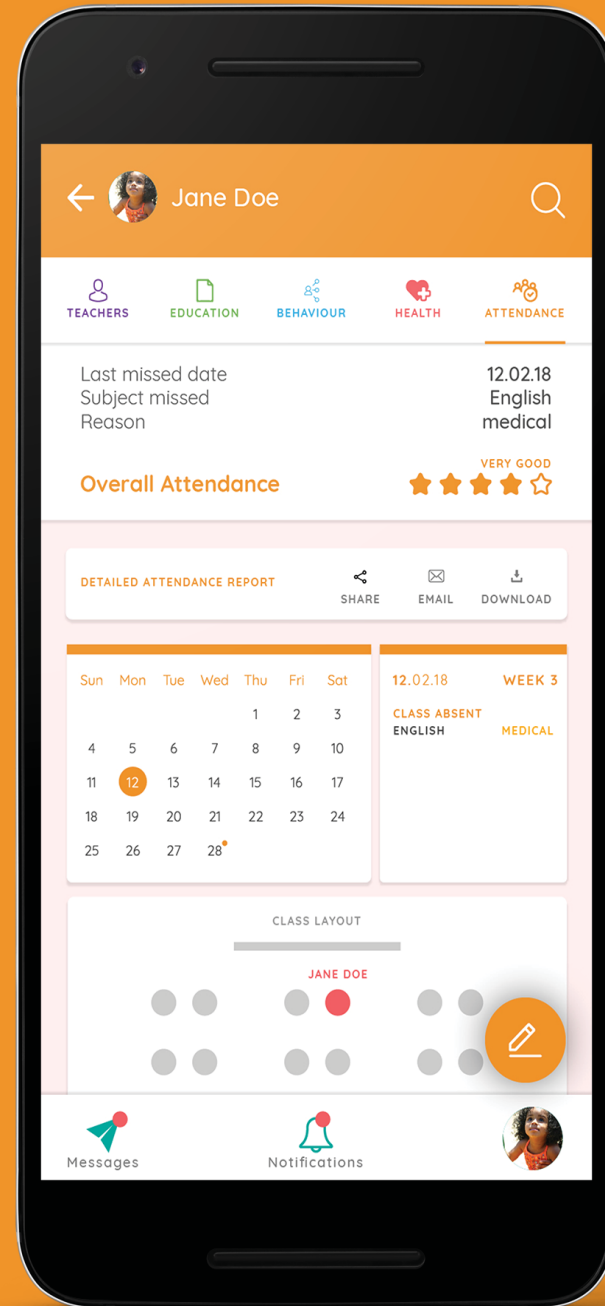

For Teachers and School

# Monitor and record students' attendance.

With ClassTeacher you can monitor students' overall attendance in real time. Record absent students or get notified on absent students.

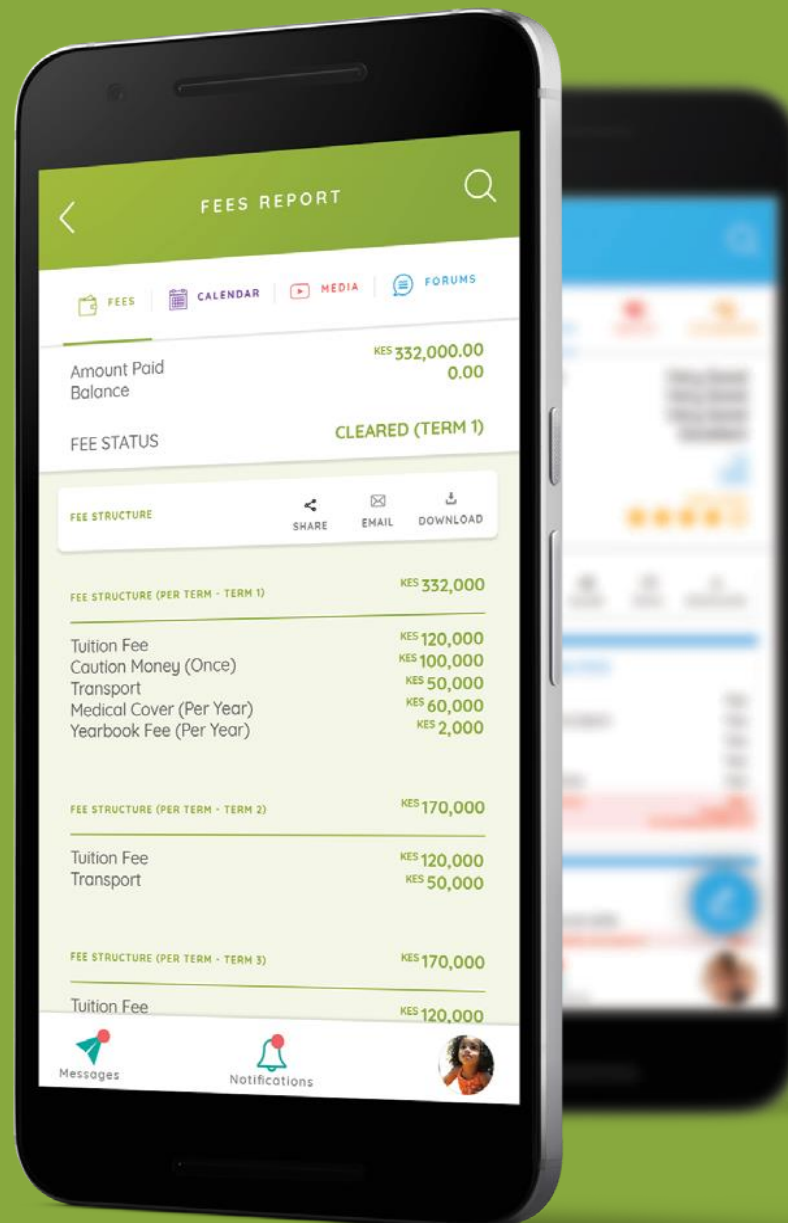

For Parents

# Be informed on your child's school fees.

With ClassTeacher, its now easy to keep track of your child's fees. Helping you to plan in advance and avoid delays.

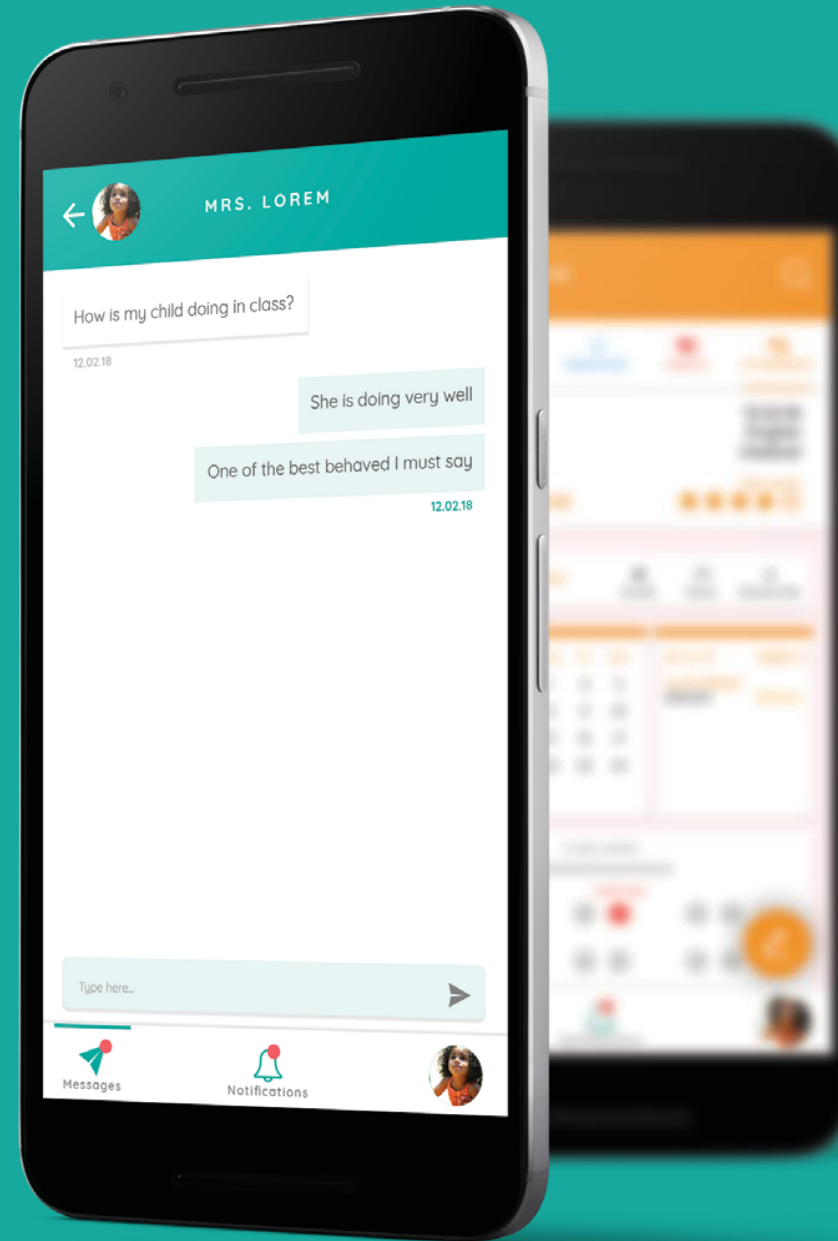

For Parents

# Communicate directly with teachers.

Get direct feedback from teachers using  
direct messages in the app.

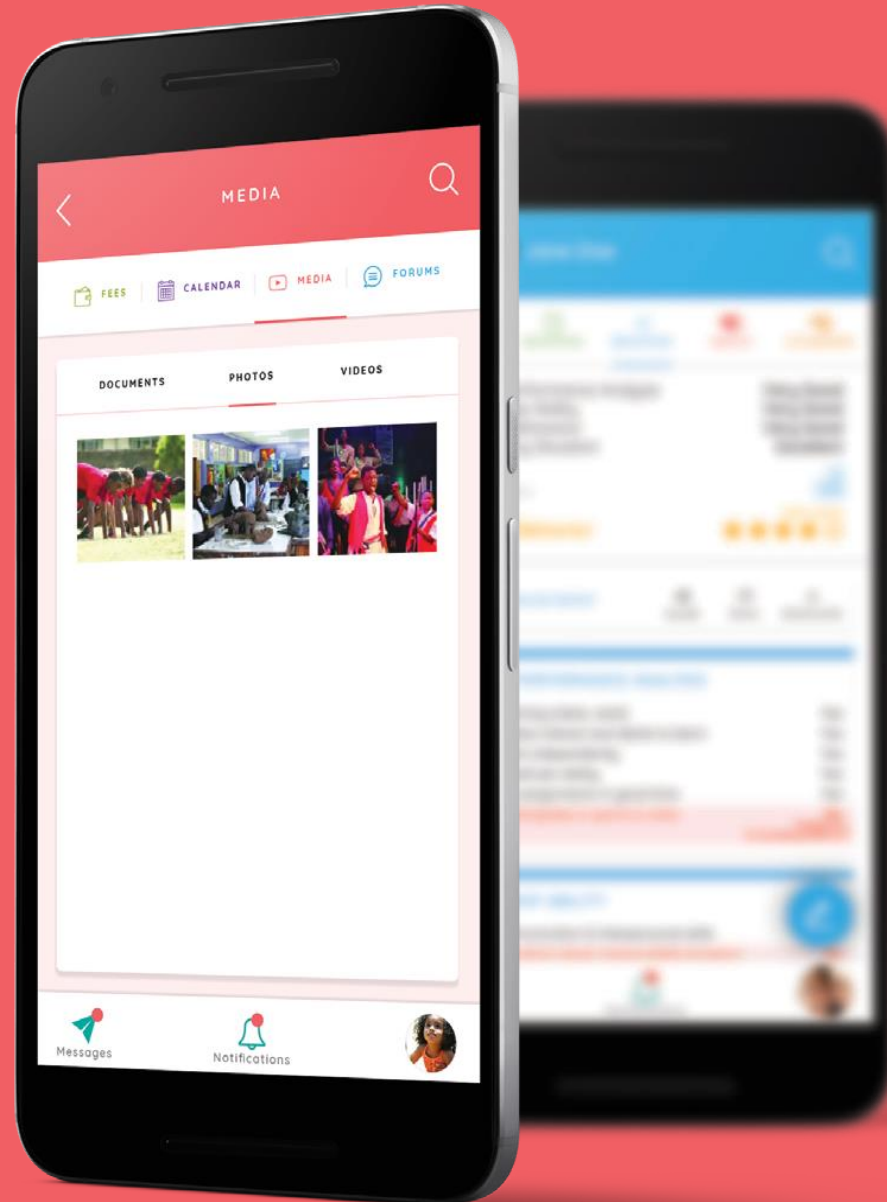

For Parents

Get photos, videos  
and much  
more regarding  
your child.

You can get photos and video of school  
events, activities  
and so much more.

# Track your child's academics. Teach your classes more easily.

Class Teacher brings **students' school activity** closer to parents and makes **teaching tools** more accessible to teachers.
